Direct or indirect involvement in the preparation of this procurement procedure: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Early termination, damages, or other comparable sanctions: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions?

Breaching of obligations set under purely national exclusion grounds: Does the person himself or a person, who is a member of the tenderer's administration, management or supervisory body or have the competence to represent or control or make decisions in such bodies, approved procedures for any of the punishable conditions mentioned above, cf. the procurement regulations § 24-2 2nd section a-f? Serious errors that cause doubt about his professional integrity Has the tenderer otherwise committed serious errors that cause doubt about his professional integrity, cf. the procurement regulations § 24-2, (3) letter in? a: Total statement of all the qualification requirements. The tenderer fulfils the stated qualification requirements. Tenderers shall only fill in this field if the contracting authority has stated in the notice, or in the procurement documents referred to in the notice, that the tenderers can be careful to fill in section a in part IV and do not need to fill in the other sections in part IV (A-D).

Breaching obligation relating to payment of social security contributions: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Breaching obligation relating to payment of taxes: Has the tenderer not fulfilled his tax and duty obligations in the country in which he is established, and in the contracting authority's member state, if this is a different country than what he is established in?

Business activities are suspended: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Bankruptcy: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current

national law without the possibility for exceptions.

Arrangement with creditors: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: Enrolment in a trade register

Description of selection criterion: Tenderers shall, upon request by the contracting authority, submit a tax certificate for VAT and tax certificates issued by a competent body in the tenderer's home country or the country where the tenderer is established. The certificate shall document whether the tenderer has fulfilled his obligations to pay taxes, duties and social security contributions. The certificate must not be older than 6 months calculated from the deadline for submitting a request for participation in the competition or a tender.

Criterion: Financial ratio

Description of selection criterion: 1. Tenderers must have sufficient economic and financial capacity to fulfil the contract. 2. The tenderer's equity shall be positive. Documentation requirement: Tenderers shall present the following documentation if requested by the contracting authority: 1. The tenderer's annual financial statement, annual report and auditor's report for the last three years and recent information (quarterly accounts) that is of importance to the tenderer's fiscal numbers. 2. A brief account of information on economic conditions or losses that are not documented elsewhere and which is required to be documented in accordance with Norwegian and/or international accounting standards. 3. An overview of any recently executed, ongoing or pending tax or public reviews of the tenderer's activities. 4. An overview of any events of significance that has taken place after publication of the last revised annual accounts. If a tenderer has a justifiable reason for not submitting the documentation that the contracting authority has required, he can document his economic and financial capacity by presenting any other document of relevance to the company's fiscal figures/economy. Tenderers shall justify why they cannot submit the documentation that the contracting authority has required.

Criterion: References on specified deliveries

Description of selection criterion: The tenderer's technical and professional qualifications. Tenderers shall have sufficient experience of a relevant nature and degree of difficulty from equivalent works included in the contract. Documentation requirement: Tenderers shall present the following documentation if requested by the contracting authority: An overview of 3-5 contracts that the tenderer has carried out or executes during the last five years calculated from the tender deadline. The overview shall, cf. the form included in chapter E2, include, among other things, the following for each of the contracts: • Name of the recipient (contracting authority). • Contact person/reference person at the contracting authority with contact data (telephone number and email address) and a statement of the person's role at the contracting authority during the contract. • Date of the delivery. • The contract's value. • What work was carried out by the tenderer, including as the main contractor or sub-contractor, and what work was carried out by sub-contractors. • A description of what the contractual works were about, including relevance to the qualification requirement.

Criterion: Certificates by quality control institutes

Description of selection criterion: Requirements of the tenderer's organisational and legal position. Tenderers shall be a legally established company or consist of a community of tenderers who are legally established companies. The requirement also applies to entities that the tenderer will use. Tenderers shall, upon request from the contracting authority, enclose a certificate from the Register of Business Enterprises or an equivalent certificate for statutory registration in the country where the tenderer or the entities that jointly constitute the tenderer are established, as well as certificates for all supporting entities.

Criterion: References on specified works

Description of selection criterion: Implementation ability The tenderer shall: 1. Have the capacity and ability to handle predicted and unforeseen conditions in the contract. 2. Offer sufficient manpower to carry out the contract. 3. Have technical and professional competence and relevant experience with the key personnel offered for fulfilling the contract. Documentation requirement: Tenderers shall present the following documentation if requested by the contracting authority: 1. An overview of the tenderer's average workforce and the number of employees in the management in the last three years. 2. An overview of the manpower that the tenderer offers to carry out the contract, including an organisation plan for the contract. 3. CVs and job descriptions for key personnel, cf. chapter C, including the following resources: -Manager - Site Manager - Quality management manager. - HSE manager - Leggebas

Criterion: Enrolment in a relevant professional register

Description of selection criterion: Particularly on newly established tenderers A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still

have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Tenderers who have established themselves within a new discipline can also be seen as newly established.

Criterion: Authorisation or membership of a particular organisation needed for service contracts

Description of selection criterion: Suppliers who participate in a working partnership Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranser-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Criterion: Security of supply

Description of selection criterion: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranser-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranser-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

5.1.10. Award criteria

Criterion:

Type: Cost

Name: Co2 - Weighting

Description: The builder in this contract will take CO2eq emissions into consideration in addition to price. This will

help reduce the environmental consequences of production and paving of asphalt. See chapter D1.3 for information on any contract points not covered by the CO₂eq weighting. The contract will be awarded the tender with the lowest tender sum. Lowest tender sum: The tender sum will be calculated by a mark-up based on the amount of CO₂eq emissions. The tenderer with the lowest combined CO₂eq emission will not receive any mark-up in the tender sum. The difference in emissions between your tender and the tender with the lowest emissions is calculated for the other tenderers. This difference is priced at 7.5 KR/kg CO₂eq. The estimate in the tender sum will thus be the difference given in kg CO₂eq multiplied by 7.5 NOK/kg CO₂eq. Example point x: 10,000 tons asphalt Supplier A delivers an EPD that shows a discharge of 50 kg CO₂eq/tonne of asphalt; i.e. emissions in total 500,000 kg CO₂eq. Tenderer A has the lowest emissions and will not receive any mark-up in the competition sum. Supplier B delivers an EPD showing a discharge of 60 kg CO₂eq/tonne asphalt; i.e. emissions in total 600,000 kg CO₂eq. The difference compared to the lowest emissions is (600,000-500,000) kg/CO₂eq and the estimate for tenderer B will be 100,000 kg/CO₂eq * 7.50 NOK/kg CO₂eq = 750,000 NOK Documentation requirement: EPD shall be delivered in accordance with EN 15804 +A2: 2019 and approved by one or several members of the type Established ECO EPD Programme Operator» in eco-platform (i.a. EPD-Norway, Environdec and IBU) for each mass type at the points described in D1.3. This shall include the modules A1-A5 and C1-C3. It will be sufficient to deliver an EPD that includes modules A1-A3 and C1-C3 for each type of mass. In addition a set-up/spreadsheet must be delivered that shows the emissions in the modules A4 and A5 for each point. Contractors must document the prerequisites and measures that are the basis for calculating their EPDs. (e.g. heating medium, use of LTA, reuse, biogenic binder etc.) The additional information form shall be completed and enclosed with the tender. The requested information in the annex "Additional Information FOR EPD Weighting of CO₂" can be stated in a separate annex. All requested information shall be provided. The proposal's CO₂ contribution shall be production specific; i.e. a separate EPD shall be available from each production location. If there are no separate EPDs, default values can be used for awarding contracts. When default values are used, real and documented values shall be included in the CO₂ accounts when the contract is completed. When calculating the bonus/malus, the default values stated in the tender shall be used. Project specific EPDs that refer to approved reference EPDs shall be available at the tender deadline and enclosed with the tender. Requirement to submit EPDs with the tender as stated above is for the points where emission ceilings are set If EPDs are submitted or budgets that state the value that exceeds the stated roof for CO₂eq, it is not assessed as a condition and the tenderer must deal with the ceiling stated in the contract and the provisions on malus.

Description of the method to be used if weighting cannot be expressed by criteria: The contract will be awarded the tender with the lowest tender sum. The tender sum will be calculated by a mark-up based on the amount of CO₂eq emissions.
