## Description

Description: This consultation concerns the work to secure the water intake of the drinking water production plant in Neuilly-sur-Marne (93), on behalf of the Syndicat des Eaux d'Ile-de-France. The Neuilly-sur-Marne plant, with a nominal production capacity of 600,000 m<sup>3</sup>/day, is supplied by a water intake on the left bank of the Marne. The work of lot n°1 concerns the renewal of the hydraulic, process, electricity-automation and civil engineering equipment of the Water Intake functional unit. The work of lot no. 2 concerns the replacement and modification of fences and the installation of a screen in the sieving waste storage area of the Water Intake functional unit.

Contract Duration: : 34 MONTH

Contract Type: : Works

dispatch\_date: 2026-02-11 00:00:00

lot\_details: 1: RENEWAL WORK ON HYDRAULIC, PROCESS, ELECTRICITY-AUTOMATION AND CIVIL ENGINEERING EQUIPMENT OF THE WATER INTAKE FUNCTIONAL UNIT, 2: REPLACEMENT WORK AND MODIFICATION OF FENCES AND INSTALLATION OF A SCREEN AT THE SCREENING WASTE STORAGE AREA OF THE FUNCTIONAL WATER INTAKE UNIT
