Notice No. 128735751

Deadline 2026-03-23

Description

Description: The Speicherstadt was removed from the scope of the HafenEG in 2012. So that the land areas of the Speicherstadt are presented as “mixed building areas” analogous to the adjacent areas of HafenCity and the city center and are to be developed as an inner-city district. In addition, the Speicherstadt was added to the UNESCO World Heritage List in 2015 together with the neighboring Kontorhausviertel and the Chilehaus under the name “speicherstadt and Kontorhausviertel with Chilehaus” . Furthermore, Hamburger Hafen und Logistik AG (HHLA), as the owner of the storage buildings, is planning to renovate and convert a large number of storage blocks. The historical use of the storage city should remain present in the cityscape. ReGe is planning various quay wall and bridge renovations on behalf of the LIG. These cover an extensive area of the Speicherstadt and will last until now. Executed successively in 2034. The road surfaces must be restored following the above-mentioned renovation measures. The planning required for this includes this tender.

Contract Duration: : 9 YEAR

Contract Type: : Service

dispatch_date: 2026-02-12 00:00:00

lot_details: 1: Development of Speicherstadt - property planning for traffic systems and engineering structures (road drainage)
