#### 2.1. Procedure

Title: (2025/3009) Portfolio management and procurement of electricity

Description: The competition is for portfolio management and the procurement of electricity.

Participants in the procurement - Kongsberg kommunale eiendom KF (2024: 20,000,000 KWh)

Lier municipality (consumption all entities, including the KF's 18,045 MWh (18,000,000 KWh)

in 2024) - Ringerike municipality (2024: Approx. 27,000,000 KWh) - Rollag municipality (2024:

5.000.000 KWh) - Øvre Eiker municipality (2024: 18 000 000 KWh) Hole municipality (option)

NOK 6,000,000 KWh the most annual volume The procurement's value for the portfolio

management is estimated to be NOK 2,000,000 excluding VAT per annum. The maximum

value for the entire contract period, including any options and expected price rise: NOK

20,000,000 excluding VAT. The annual procurement of power is estimated to be 95,000,000

KWh based on the 2024 figures. The need is uncertain. The volume can vary both up and

down and the contract period will depend on, among other things, the contracting authority's

needs, activities, budgetary situations and other framework factors. See the procurement

documents for further information. Procurement of electricity itself is exempted from the

regulations, cf. the procurement regulations §13-4 letter e. This procurement is therefore

considered to have an immaterial impact on climate and the environment, cf. the Regulations §

7-9, fifth paragraph. The justification for this is that the procurement is for consultancy services

/consultancy services where the contracting authority has been cut off from affecting climate

and environmental impact, as the requirements and criteria that are aimed at these elements

will not have sufficient connection to the delivery, cf. DFØ's environmental supervisor. The

obligation to make requirements for apprentices is considered to apply for this procurement, cf.

the Procurement Act §7.
